

AYUSH KUMAR BISWAL

Full Stack Developer | AI Product Builder | B.Tech CSE '26

[Email](#) | [Phone](#) | [LinkedIn](#) | [GitHub](#) | Odisha, India

PROFESSIONAL SUMMARY

Final-year B.Tech CSE student with hands-on experience building scalable, responsive web interfaces using **React, Tailwind CSS, JavaScript (ES6+)**, Python, Node.js, and REST APIs. Strong foundation in **converting wireframes into high-quality, reusable code** using component-based software architecture. Experienced building end-to-end products across Android (Java), web (React/Node.js), and AI-integrated platforms. SIH Finalist and TCS CodeVita Global Rank 5771.

TECHNICAL SKILLS

Languages: JavaScript (ES6+) • Python • Java • XML

Mobile: Android (Java) • Android Studio

Frontend: React • Tailwind CSS • HTML5 • CSS3 • Responsive Design • Component-Based Architecture

Backend: Node.js • Express.js • REST APIs • API Integration • CRUD Operations

Databases: MySQL • MongoDB • Firebase (Firestore, Authentication)

Tools & Core: Git • GitHub • VS Code • DSA • OOP • SDLC • State Management

Design: Figma • UI/UX • Wireframing & Prototyping

PROFESSIONAL EXPERIENCE

Independent Full Stack Developer *June 2026 – Present*

- Building FlowMind, an AI-powered productivity platform using React, JavaScript, Firebase, and AI APIs.
- Implemented 4 core modules: Firebase Authentication, AI task recommendations, analytics dashboard, and confidence scoring engine.
- Architected a responsive, reusable React component library styled with **Tailwind CSS**; maintained strict **Git version control** and debugging practices throughout development.

PROJECTS

FlowMind – AI-Powered Productivity Platform

Tech Stack: React • Tailwind CSS • JavaScript (ES6+) • Firebase • AI APIs • Figma

- Designed high-fidelity UI/UX prototypes in Figma and translated mockups into responsive, high-quality code using React and Tailwind CSS across 6 key screens.
- Built 4 core modules: AI task planning, deadline management, confidence scoring, and personalized insights integrated via REST API calls to AI services.
- Developed responsive frontend using reusable React components; implemented Firebase Authentication and Firestore for real-time data sync.

Smart OPD – Hospital Management System

Tech Stack: Node.js • Express.js • MongoDB • Flask • JavaScript

- Developed 3 core modules: OPD queue management, real-time bed availability tracking, and patient admission workflow.
- Built 8+ RESTful API endpoints for queue status, bed updates, and patient records; MongoDB data layer with 3 collections.
- Developed as part of the Smart India Hackathon (SIH) team; project reached national Finalist stage.

SnappRail – AI-Powered Digital Grievance Management Platform

Tech Stack: React.js • Tailwind CSS • Firebase (Firestore, Auth) • AI APIs • JavaScript (ES6+) • Git

Architected a mobile-first web app using Html and Tailwind CSS for railway passengers to seamlessly lodge complaints with automated PNR, coach, and issue tracking.

Engineered Real-Time Ticket Tracking Dashboard utilizing Firebase Firestore for zero-refresh, live status updates (Pending, Assigned, Resolved) across passenger and admin views. Designed modular components optimized for low-bandwidth networks and cross-browser responsiveness.

EDUCATION

B.Tech in Computer Science & Engineering

GIET University, Gunupur

Expected Graduation: 2026

ACHIEVEMENTS & CERTIFICATIONS

- Finalist, Smart India Hackathon (SIH) — national-level government hackathon.
- Global Rank 5771, TCS CodeVita Season 13 — competitive programming contest with 146,922 participants.
- Team Lead, NSS — coordinated volunteers at GIET University's annual Shrujan festival.
- Java Full Stack Development — Giet University, Gunpur | June, 2025
- Data Science Internship — Cognifyz Technologies | April, 2024
- Web Development — InternPe, E-Cell IIT Hyderabad | March, 2023
